Density Column Practice

Solve the following density problems. Then list the items in the density column in the order they would be.

- Write the formula for density. _____
- Orange Juice mass = 18 g volume = _____ density = 6 g/mL
- Milk mass = 8 g volume = 2 mL density = _____
- Water mass = 15 g volume = 5 mL density = _____
- Com Oil mass = _____ volume = 6 mL density = 5 g/mL
- Melasses mass = 21 g volume = _____ density = 7 g/mL
- Soy Sauce mass = _____ volume = 7.5 mL density = 2 g/mL
- If an aluminum cube had a mass of 20g and the length of each side was 2 cm, between what to liquids would it float? _____
- If an Iron block had a length of 2 cm, a width of 3 cm and a height of 1 cm and a mass of 33 g between what two liquids would it float? _____
- Not including the metals, what is the total volume in the density tube? _____

6. a. Complete the following table of Trial 1 (See Report Sheet) for determining the molar concentration of a standard NaOH solution, followed by the determination of the molar concentration of a monoprotic acid solution according to the experimental procedure. Record calculated values with the correct number of significant figures.

A. Standardization of a Sodium Hydroxide Solution		Calculation Zone
1. Tared mass of $\text{KHC}_8\text{H}_4\text{O}_4$ (g)	0.411	Part A.3
2. Molar mass of $\text{KHC}_8\text{H}_4\text{O}_4$ (g/mol)	204.44	
3. Moles of $\text{KHC}_8\text{H}_4\text{O}_4$ (mol)		
Show calculation.		
4. Buret reading, initial (mL)	4.20	
5. Buret reading, final (mL)	19.90	
6. Volume of NaOH dispensed (mL)		Part A.7
7. Molar concentration of NaOH solution (mol/L)		
Show calculation.		
B. Molar Concentration of an Acid Solution		Part B.6
1. Volume of acid solution (mL)	25.0	
2. Buret reading, initial (mL)	3.70	
3. Buret reading, final (mL)	20.47	
4. Volume of NaOH dispensed (mL)		
5. Molar concentration of NaOH solution (mol/L)		Part B.7
6. Moles of NaOH dispensed (mol)		
Show calculation.		
7. Molar concentration of acid solution (mol/L)		
Show calculation.		

6. b. For Trials 2 and 3, the molar concentration of the acid was 0.922 M and 0.856 M respectively.

- What is the average molar concentration of the acid solution? Data Analysis, B.
- What are the standard deviation and the relative standard deviation (%RSD) for the molar concentration of the acid solution? Data Analysis, C and D.

Name _____

Storage Devices to Save is to Store

- stores programs inside your computer (C: drive)
- stores videos
- is network device
- stores music
- stores files to take home from school

A. B.

C. D. E.
